Gas Storage Europe (GSE) has implemented today the second step of enhancing the **GSE Aggregated Stock Inventory**, the organization's gas storage transparency scheme.

The enhancement, which has been implemented on a trial basis in October, consists in the increase of the publication frequency from weekly to daily and the extension of the platform to add information on gas inflows and outflows over the stock level data. The publication takes place at 18:00 CET each day with data being aggregated per 8 trading hub areas.

The daily scheme currently includes data for 29 storage system operators representing over 63 bcm of technical storage capacity. Overall, the capacity coverage of the daily publication accounts for approximately 77% of the European storage capacity and it is expected to expand further.

The GSE Aggregated Stock Inventory can be found at: <https://transparency.gie.eu.com/>

Jean-Marc Leroy, GSE President, said: "With the daily publication tool, GSE is offering an enhanced level of information transparency on storage, which is one of its key priorities. I am confident that the daily scheme will bring much added value and am proud of the contribution that GSE is making towards the further development of gas market in Europe."

Adding to this, **Lubor Veleba**, Chairman of the GSE Transparency and Capacity Working Group, noted: "GSE has been working hard over the past months with the support from ERGEG to meet its commitment made at the last Madrid Forum and to develop the daily publication tool for storage. A lot of effort has been put into the creation of the platform and further work will be done to make the tool even more comprehensive. I am certain that the GSE daily publication scheme will continue to enjoy a positive response from market."

Note to Editors

Gas Storage Europe (GSE) represents the interests of **33** Storage System Operators with around **110** storage sites in **16** countries in Europe, representing approximately 70 bcm, i.e. **86%** of EU technical storage capacity. GSE is one column of GIE, Gas Infrastructure Europe, the European association of the Transmission, Storage and LNG terminal Operators. GSE is committed to improving the regulatory and investment framework for storage activities in order to help its members to continue providing secure, efficient and valuable storage services to the market.
